The Honorable George Voinovich
United States Senate
524 Hart Senate Office Building
Washington, DC 20510

Dear Senators Carper and Voinovich:

As a uniquely broad coalition of environmental, science-based, public health, industry, labor and state and local government groups, we thank you for your efforts to reauthorize the Diesel Emission Reduction Act (DERA), scheduled to expire at the end of fiscal year 2011. The program has been extremely successful in providing cost-effective public health and environmental benefits. We strongly support your proposed legislation reauthorizing this worthwhile program.

Diesel-powered vehicles and equipment play an important role in the nation's economy and are getting cleaner every day. DERA, originally enacted in 2005 with overwhelming bipartisan support, was designed to reduce emissions from the 20 million existing diesel engines in use today by as much as 90 percent.

Since enactment, DERA has been successful from an economic, environmental and public health perspective, yielding one of the greatest cost-benefit ratios of any federal program, according to the Office of Management and Budget calculations. In a recent Report to Congress on the first year of the DERA program, the Environmental Protection Agency (EPA) estimates that for every dollar spent on the DERA program, an average of more than \$20 in health benefits are generated. Every state in the nation now has a diesel retrofit program and benefits from DERA funding.

We strongly support efforts to reauthorize the program for an additional five years at the current authorized level of funding along with modest changes as reflected in your draft bill. These changes will make the program more effective by streamlining the grant process, improving EPA's administration, removing outdated language, and ensuring full consideration of the congressional policies and priorities established in the law.

Sincerely,
